

Healthline Information Systems

Data Acquisition, Management and System Integration Solutions for Healthcare

HealthE Vitals

HealthE  Vitals integrates the new generation of digital “snapshot” vital sign devices with your clinical workflow and information systems. Designed to support any device with integrated data exchange capabilities, including the BpTRU and Omron units. **HealthE  Vitals** is integrated with our exclusive **HealthE  Flow** workflow platform that includes MEDITECH interfacing. **HealthE  Vitals** supports multiple workflow models, “device only” batch vitals data collection or “documentation integrated” vitals capture. Eliminate tedious and error prone paper based vital sign documentation methods today!

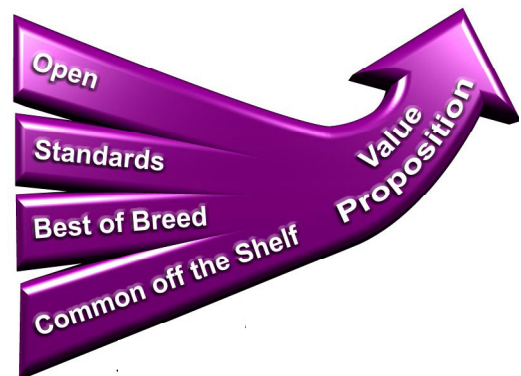

Features and Benefits of Healthline HealthE Vitals

- Capture and transfer vitals data to MEDITECH, **HealthE  Forms** or other applications.
- Batch or in-process vitals capture.
- Automatic vitals to patient association.
- Positive Patient Identification support.
- **Active  Link** integrates the vitals capture process with MEDITECH or other Windows applications.
- **HealthE  Flow** manages and audits end user tasks.
- HL/7 interface supports ADT data transfer to **HealthE  Vitals** and vital sign data transfer to MEDITECH.

Base Price \$6,995

- License for 10 units.
- Additional units \$595 per device.
- Setup service \$1,995.
- Annual Support; 5x9 \$1,295, 7x24 \$3,495.
