Data Acquisition, Management, and System Integration Solutions for Healthcare

## HealthE Cardio

### Mortara Modality Worklist Service

Get the benefits of real-time orders downloaded directly to your Mortara ELI resting ECG unit for a fraction of the cost of a full ECG management system.

The HealthE\*Cardio Mortara Modality Worklist Service provides the ability to acquire patient data directly from your hospital information system allowing your staff to simply pick the patient from the device worklist, saving time, reducing errors and increasing study accuracy and staff productivity.

#### Benefits

- Eliminate manual typing of patient information
- Reduce patient information errors
- Improve staff productivity

#### Features

- Supports MORTARA ELI ECG devices
- Worklist downloaded to the ECG unit
- Custom ID field download supported
- Custom worklist query codes supported
- No HL7 interface required!
- No other PACS components required!
- Populate the worklist from order entry, scheduling or ADT (current census by area on the device!)

#### DICOM® support

- Modality Worklist

#### Upgrade Options

- One-way HL7
- Two-way HL7 (order status updates for automatic charge posting)
- Central Archiving
- Full ECG management workflow
- Clinical System integrated waveform viewing!

#### Base Price \$3,995

- License for 2 ECG units.
- Additional ECG units \$995 per device.
- Setup service \$1,995.
- 30 days of support included.
- Annual Support; 5x9 \$1,295, 7x24 \$3,495.

#### Requirements

- Workstation/Server running Windows OS
